HDMI Modulator

HDM100 1-input & HDM200R 2-input

Channel Vision's HDMI RF Modulators are designed to create a high definition TV channel from any HDMI video source and distribute it to multiple TV's on a user selectable ATSC or QAM TV channel. Distribute high definition content from Satellite, Cable TV receivers, PC, Media Players, DVR's and virtually any HDMI source. Setup and configuration by our web interface remotely or the front panel.
