

SURGE[®]X

Surge Elimination Outside of a Rack

The SurgeX Standalone lineup protects mission-critical equipment in environments outside of a rack. Their compact design easily fits along, behind, or near equipment, takes up minimal space, and are perfect for AV, surveillance, and monitoring systems.

Featuring Advanced Series Mode technology and Impedance Tolerant EMI/RFI filtration, they provide patented surge elimination and conditioning for equipment that relies on peak AV performance. Unlike common protection solutions, the Standalone's patented technology is comprised of non-sacrificial components that never degrade or fail, guaranteeing equipment stays protected. They eliminate surge energy up to 6,000 Volts without producing harmful ground contamination or common mode disturbances that can cause hissing sounds and pixelation on AV systems to ensure pristine sound and video.

Available in four configurations, the Standalone products safeguard connected equipment from harmful surges, spikes and electrical transients that can cause malfunction, downtime and unnecessary expenses.

Features:

- ▶ Compact design
- ▶ Non-sacrificial components
- ▶ 2 and 10 receptacle configurations
- ▶ 9' grounded 3-wire cord
- ▶ IP enabled (SA-20-AR)
- ▶ Magnetic shielding steel enclosure

Model	Plug Config.	Outlet Config.
SA-1810	15A / 120V	10 Outlets
SA-15	15A / 120V	2 Outlets
SA-20	20A / 120V	2 Outlets
SA-20-AR	20A / 120V	2 Outlets
